

First Time Access

Remaining Setup

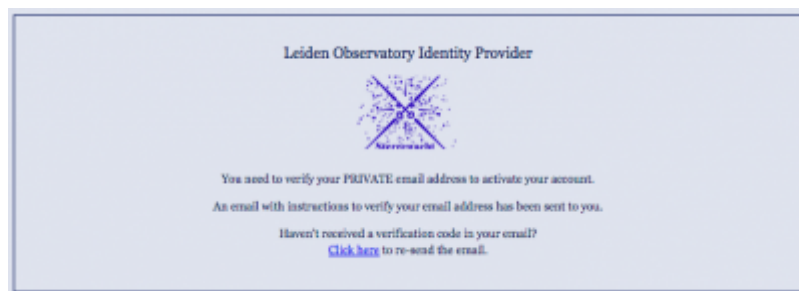

Figure 1: Private Email Address Confirmation (Click image to enlarge).

The Identity Provider will then present you a window explaining that an email has been sent to your 'private email box'. This email contains a link (yes, indeed it is a clickable link, which is necessary as the security key provided is too complicated to type it in. But you should make sure that the link is pointing to our `idp.strw.leidenuniv.nl` identify server. Only after this verification you should click the link).

Now look at your private mail inbox and find there the mail with
Subject: Leiden Observatory Identity Management verification email
From: Observatory Identity Provider idp@strw.leidenuniv.nl
And body text, similar like this:

```
Someone is trying to setup two factor authentication on the Leiden  
Observatory Intranet system. If this was you,  
it is save to copy/paste the link below to verify your email address, but  
please do verify it is going to the  
Observatory Identity server: idp.strw.leidenuniv.nl.  
The link for email address verification is:  
https://idp.strw.leidenuniv.nl/auth/realms/STRW/login-actions/  
action-token?key=eyJhbGciOiJIUzI1NiIsInR5cCIgOiAiSldU...  
BqPjnSig&client\_id=local.strw.leidenuniv.nl&tab\_id=KADCiBDmsaY
```

This link will expire within 5 minutes.

If you didn't initiate two-factor authentication, just ignore this message.

where the text Link to e-mail address verification contains the link to verify and confirm your 2FA setup. For your information the link starts like:
<https://idp.strw.leidenuniv.nl/auth/realms/STRW/login-actions/action-token?key=eyJhbGciOiJIUzI1NiIsInR5cCIgOiAiSldU...> and the key is a long series of characters.

Pasting the link in a WEB browser asks again for your credentials. Submit this form and you are now fully setup for Two Factor Authentication.

A private email address is necessary to allow you to reset 2FA if necessary.
